READINESS PACKAGE GRANT APPLICATION FORM TEMPLATE

Application for a Grant to support NIE accreditation through the readiness package

Submission Date: March 31, 2023

Adaptation Fund Grant ID:

Country receiving support: BURKINA FASO

Institution to navigate accreditation process, if already identified: Fonds d'Intervention pour l'Environnement (FIE)

Name of Implementing Entity delivering support: Centre de Suivi Ecologique (CSE)

Type of Implementing Entity delivering support (NIE/RIE/MIE): NIE

A. Timeframe of Activity

Expected start date of support	July 2023
Completion date of support	August 2024

B. Experience participating in, organizing support to, or advising other NIE candidates

CSE was the first institution to experiment the direct access, first with the AF, then with the GCF. On the strength of this pioneering experience, CSE has been requested since 2012 by institutions from developing countries wishing to assess themselves against the requirements of accreditation (AF and GCF) and / or to prepare their accreditation files. The CSE thus aided in the form of advisory support by e-mail, but also through telephone interviews and site visits. In 2016, CSE organized in collaboration with the IFDD (Institute of the Francophonie for Sustainable Development) a regional workshop during which twelve (12) French-speaking countries of Africa and Haiti were familiarized with the AF and the GCF, their policies and procedures, but also and above all their accreditation process.

CSE was also the first institution to participate in the AF's Readiness programs, in particular in its South-South Cooperation component. Since 2014, CSE has provided technical assistance to ten (10) institutions in developing countries. These include:

- identify a national institution applying for accreditation;
- strengthen the capacities of the institution selected for the accreditation process;
- support the institution selected in the collection and analysis of the documents required for accreditation; and

- assist the institution selected in the organization and submission of its accreditation request file.

CSE has thus developed a number of tools relating to:

- screening to identify the institution with the best profile;
- analysis of the comments made by the Accreditation Panel (PA) on the accreditation request files during previous sessions of the AF Council;
- a summary of fiduciary standards;
- a checklist of required documents.

In addition, CSE developed, submitted and implemented Readiness program of the GCF, serving as fiduciary agent for six (6) countries (Senegal, Togo, Cote d'Ivoire, Chad, Djibouti, DRC) with 8 Readiness programs implemented with as main missions from:

- Develop and implement Readiness requests;
- Manage legal arrangements and implementation of Readiness support
- manage financial resources;
- make purchases and recruitments;
- assist the Designated National Authority in monitoring and evaluating deliverables;
- Prepare progress and closure reports for Readiness agreements;
- carry out audits.

It is summarized in the table below the list of the various initiatives in which CSE and its staff have participated over the past eight (8) years.

CSE provided also intermediary services in the first Readiness Package launched in 2018 to support Mali and Burundi in preparation of relevant missing documents related to fiduciary and governance aspects. This process is closed in 2020 with the submission of accreditation folder through the accreditation's system by the two entities.

The readiness package comes as a complement to consolidate the technical support provided through the South-South cooperation grant. It enables NIE applicants to obtain the financial resources that allow us to recruit firms for the preparation of documents related to (fiduciary aspects, strategic plan, internal audit, and ethics manual) that cannot be backed by conventional support.

The main results of this support are mentioned below:

- Grievance and redress mechanism in place;
- Technical assistance for developing a transparency policy and including procedures on conflict of interest and whistleblower protection;
- Internal audit manual developed;
- ESS & Gender policies developed;
- Strategic plan developed;
- Project cycle manual develop;
- M&E manual developed.

The following two tables summarize the various initiatives that CSE and its staff have participated in over the past eight (8) years.

(i) Describe the support provided for accreditation through readiness grants from the Adaptation Fund to developing countries and/or entities seeking to use the Fund's Direct Access modality.

C. Proposed activities to support NIE accreditation

- (i) Describe the initial exchange that took place with the candidate entity and with the DA e.g., state with who (director, committee, DA etc.). Also state when the discussion took place and state what conclusions were arrived at. e.g., briefly state what issues the identified candidate NIE(s) is likely to face considering its experience managing project finance, its institutional capacity and experience implementing and managing the full climate change or development finance project life cycle, and its competency for transparency, self-investigative powers and anti-corruption measures.**

Highly concerned about the budget deficit in terms of funding for the environment, the Director General of the Intervention Fund for the Environment (FIE) and the National Designated Authority of the Green Climate Fund (GCF) met with the Director General of Cooperation in December 2021 to discuss different alternatives to mobilize financial resources.

Furthermore, the Director General of Cooperation (DGCOOP) acting as the Designated Authority (DA) of the Adaptation Fund (AF) having appreciated the submission in March 2021 of the FIE's application file as an accredited entity to the Green Climate Fund, decided to extend this initiative to the AF. Working sessions were therefore held during the first quarter of 2022 to assess the ability of the FIE to be a candidate national implementing entity for the FA.

The application of the FIE for its accreditation to the Adaptation Fund has been reviewed in accordance with the conditions required in terms of environmental and social management standards, fiduciary management standard and transparency, gender policy, proven experience in environmental project management.

As a result, the FIE has been deemed fit to fulfill most of the accreditation requirements and was officially appointed on May 13, 2022 by the DA as a national implementing entity to be accredited with the Adaptation Fund.

- (ii) Describe results of the self-assessment done by the candidate NIE or assessment done by intermediary on suitability of the candidate/nominated NIE to meet the accreditation criteria. Confirm whether any candidate NIE staff took the AF online course on accreditation and explain how the learning outcome from taking this**

course has been incorporated into the proposal. (The AF accreditation course can be found [here](#)).

The CSE conducted a compliance assessment of the FIE documents to identify gaps that need to be addressed according to the Adaptation Fund (AF) requirements.

The results showed that FIE has a strong financial management with a transparent system, control of fraud and mismanagement and well-defined accounting procedures with recognized software packages. However, there is a need to establish an operationalize an independent audit committee, although terms of Reference have already been developed but the members not yet designated.

In terms of procurement rules and procedures, the FIE uses the general public procurement code of BURKINA FASO. Therefore, a procurement manual specific to the FIE should be developed, which will certainly follow the guidelines of the general public procurement code of Burkina FASO and take into account the requirements of the AF.

At the strategic level, the FIE has a strategic plan covering the period 2021-2025, with a new vision as follow: "To become, by 2025, an accessible financial tool, federating national and international green financing for the benefit of environmental projects for the well-being of the populations of Burkina Faso". In this regard, four (4) strategic axes have been defined and are broken down as follows

- Strategic Area 1: Effective mobilization of additional resources for the financing of initiatives
- Strategic Area 2: Improving the governance of the FIE
- Strategic Area 3: Promotion of a green economy taking into account gender, environmental and social standards
- Strategic Area 4: Financing projects with a high impact on the adverse effects of climate change

There is therefore no need to update the strategic plan.

The Project management cycle has a very strong foundation as a manual entitled "Procedures and Operations Manual" accompanied by a "Promoter's Procedure Manual" has been put in place to facilitate project implementation. However, the review of the document identified areas for improvement such as the quality review at entry, the project at risk system and the inclusion of environmental, social and gender risks upstream during project implementation.

Regarding project monitoring and evaluation, the manual should be updated to incorporate risk management and independent project evaluation frameworks to comply with the AF standards.

The gender policy put in place by the FIE takes into account the gender mainstreaming dimension at both the institutional and project levels. The policy document was developed taking into account the standards of the GCF and the AF on the issue. The gender policy is structured around five (05) main parts, namely;

- Part 1: Context and justification of the policy;
- Part 2: Methodological approach;
- Part 3: Diagnostic analysis, issues and challenges;
- Part 4: Strategic framework for intervention;
- Part 5: Implementation and evaluation mechanism.

In this sense, there is no need to update the gender policy.

In terms of Transparency, self-investigation powers and anti-corruption measures, the assessment revealed the absence of policies and procedures for conflict of interest management and whistleblower protection, as well as the absence of an objective investigation function into allegations of fraud and corruption. Thus, mechanisms and procedures should be put in place to address these identified gaps.

The evaluation found that some documents had been developed but needed to be updated to incorporate the requirements of the FA in terms of

- Monitoring and Evaluation Manual
- Project Cycle Management Manual
- Anti-fraud and AML/CFT policy including whistleblowing procedures and whistleblower protection.

These documents listed below were missing at the time of the institutional assessment:

- Public procurement manual based on the public procurement code;
- Grievance management manual

In addition, it will be important to appoint an ESS and gender focal points for the implementation of the systems that will be put in place.

Mr. Adama OUATTARA, Management Controller and Mr. Polycarpe Becquet BATIONO, Director of Research and Fundraising Fund took the online course on “Direct Access: Unlocking Adaptation Funding (Self-Paced)”. Through the administered modules, they strengthened their skills on the Adaptation Fund (AF) accreditation process, key concepts and requirements.

Module 1, which deals with Accreditation, allowed the two participants to become familiar with: the definition of a designated authority and its role in the appointment of entities; the fiduciary standards of the Fund and how they apply to the different types of accreditation and re-accreditation; and the stages and governing bodies involved in the regular accreditation process.

As for module 2, it covered environmental, social and gender considerations in the design and implementation of Adaptation Fund projects. Participants gained new insights into: the AF project approval process; the Environmental and Social Policy (PES); the Gender Policy (PG); the risk identification process; Environmental and Social Management Plan (ESMP) and Monitoring, Reporting and Evaluation requirements. They also learned information on how to complete the relevant ESP and GP sections in the “funding request” templates; the characteristics of a consultation process; and strong grievance mechanism.

The main results that have been used and integrated in the submission are the need to ensure compliance of the Environmental Intervention Fund (FIE) document with the requirements of the FA mainly the social dimension of the ESS. He also noted the importance of risk identification and adoption of consultative process and grievance mechanism in project design. Namely the supporting documents such as the ESS, the ESMP, the GP, the Strategic Plan and the Project Management Cycle have been taken into account and the need to review the documents that already exist to better meet the requirements of the AF.

(iii) Briefly justify why the nominated NIE candidate is best suited to meet the accreditation criteria.

The creation of the Environmental Intervention Fund (FIE) stems from the desire of the Republic of Burkina to have a permanent national implementing entity for the financing of its environmental policy. The FIE is therefore the vehicle set up by the government of Burkina Faso to play a key role in achieving environmental ambitions.

Since its operationalization in 2015, the FIE has been working to finance environmental projects and initiatives with the support of Luxembourg and Swedish cooperation, the World Bank, the African Development Bank and UNCDF.

The FIE has a definite advantage in that it has already submitted its application to the Green Climate Fund. For information, the FIE was notified in January 2023 of its accreditation as a Delivery Partner for the GCF.

(iv) Provide a list in chronological order of occurrence, of the main components/steps that would be implemented to address the NIE candidate gaps/challenges, the activities to be undertaken, and the requested budget to support accreditation of the NIE candidate. An example is provided within the table in italics
