

Revised Mali Renewable Energy Integration (REI) Investment Plan - November 2023

Comment Type	Commenter Name	Commenter Profile	Comment	Date
Comment 1	david.arnold@giz.de	Germany	<p>Germany would like to express its gratitude to the Government of Mali, the AfDB as lead MDB as well as the WBG for the work they've done with regards to the revision of the IP. The document now generally appears to be in line with the comments that were provided by GCAP SC members throughout the last few months. We are therefore comfortable approving this revised IP and are looking forward to its implementation.</p> <p>We do, however, have one question which is not tied to our approval - a response can therefore be provided at a later point in time. We want to thank the AfDB for updating Chapter VI concerning the Risk Assessment as well as the MESRAEP Security Risk Assessment that was provided. The AfDB states in that same chapter that it will elaborate a "specific study on the security aspects of the IP projects" which will be included in the annex to the revised IP. The present IP, which to our understanding already is the revised IP, however contains no such study in the annex. Is there a timeline for this study to be shared with the GCAP SC?</p>	11/20/2023 4:07:25 PM
Comment 2	Patience.Tembo@mgee.gov.zm	Zambia	<p>Zambia would like to thank the Mali government, the World Bank and the AfDB, for their contributions to the IP amendment process. Overall, the paper now reflects the feedback that GCAP SC members provided. As a result, we feel confident in approving this updated IP and are eager for its deployment.</p>	11/20/2023 9:22:07 PM
