Approval of PPCR funding for Building Capacity for Climate Resilience Project for Tajikistan (ADB)

The PPCR Sub-Committee approves US\$ 6,000,000 in PPCR funding for the project, *Building Capacity for Climate Resilience*, as part of the Strategic Program for Climate Resilience for Tajikistan. The Sub-Committee also approves US\$ 350,000 in PPCR funding for the project implementation and supervision services for ADB. It is noted that this request includes the two components proposed in the SPCR endorsed in November 2010 for the *Climate Science and Modeling Program (US\$3 million)* and *Building Capacity for Climate Resilience (US\$3 million)*, that have now been merged under one Capacity Development Technical Assistance (CDTA).
